

Senior Front-End Developer

CMP Advanced Mechanical Solutions is a trusted North American supplier of metal enclosures and high precision is seeking a passionate, talented, roll-up-your-sleeves, hands-on, highly independent Senior Front End Developer for a permanent position.

You will be responsible for improving and extending the web interface of our web application, a zero-defect manufacturing solution. Our team works at a fast pace on an awesome product that is constantly evolving and improving so we're looking for someone who can pick things up quickly. Your job will be dynamic, interesting and challenging. We have a great team overall and offer a flexible, respectful and healthy work environment.

Responsibilities:

- Develop and maintain clean, well-engineered front-end code that conforms with accepted standards
- Communicate effectively with team members
- Proactively identify opportunities for process and software improvements and make constructive suggestions for change
- Produce and maintain technical documentation
- Identify new technologies that can improve product development and the user experience
- Utilize your trained eye for UI and design to make efficient, pleasing, and robust iterations on our product and websites
- Ensure that customer issues and technology failures are detected, isolated, and resolved rapidly, and prevented from happening again

Skills & Requirements:

- 5 to 8 years of experiences developing rich interfaces at a consumer-facing web company
- A university or equivalent degree in one or more disciplines ranging from graphic design to computer science
- Expert level coding skills in XHTML, CSS, Javascript, and SVG
- Advanced knowledge of many Javascript libraries, including JQuery and JQuery UI
- Advanced AJAX knowledge
- Knowledge of all browser types and their various idiosyncracies
- Prior experience in a LAMP development environment

- Strong experience in UI conceptualization
- Experience building multilingual web applications
- Able to speak and write fluently in French and English
- Proficient with GIT and other source control systems
- Ability to work independently while also participate actively in an Agile/SCRUM environment
- Experience mentoring other developers
- Ability to take initiatives and ownership of the team's work

If you have the relevant experience please apply now or send your resume to cv@cmp-ams.com.
