

Senior PHP Developer

CMP Advanced Mechanical Solutions is a trusted North American supplier of metal enclosures and high precision machining is seeking a passionate, talented, roll-up-your-sleeves, hands-on, highly independent Senior PHP Developer for a permanent position.

You will be responsible for improving and extending the back-end of our web application, Visual Knowledge Share, a zero-defect manufacturing solution. Our team works at a fast pace on an awesome product that is constantly evolving and improving so we're looking for someone who can pick things up quickly. Your job will be dynamic, interesting and challenging. We have a great team overall and offer a flexible, respectful and healthy work environment.

Responsibilities:

- Develop and maintain clean, well-engineered code that conforms with accepted standards;
- Communicate effectively with team members;
- Proactively identify opportunities for process and software improvements and make constructive suggestions for change;
- Produce and maintain technical documentation;
- Identify new technologies that can improve product development and the user experience;
- Work closely with databases;
- Build and maintain unit tests;
- Design and create web services for front-end use and integration with other systems;
- Ensure that customer issues and technology failures are detected, isolated, and resolved rapidly, and prevented from happening again.

Skills & Requirements:

- 5 to 8 years of experiences developing high-availability web applications, where users stay connected for many hours at a time;
- A university or equivalent degree in computer science;
- Expert level coding skills in PHP;
- Advanced knowledge of many PHP application frameworks, such as Symfony, Zend, CakePHP, etc.;
- Strong database skills and experience with MySQL and other RDBMS;
- Strong experience in UI conceptualization;
- Experience building multilingual web applications;

- Able to speak and write fluently in French and English;
- Proficient with GIT and other source control systems;
- Ability to work independently while also participating actively in an Agile/SCRUM environment;
- Experience mentoring other developers;
- Ability to take initiatives and ownership of the team's work;

If you have the relevant experience please apply now or send your resume to cv@cmp-ams.com.
